To

Mr. Amit Tandon

13, New Estate, Ring Road, Chandigarh

Respected Mr. Amit Tandon,

With the current slowdown in hiring within the high- tech field, you must be flooded with resumes from out-placed soft engineers such as me. Please take a moment to consider my qualifications. I believe in particular is highly marketable in this tight market:

I worked on the team that pioneered the technology that put the Palm Pilot on the map.

In today's increasingly mobile society, this technology has places to go, and I have ideas that could take us to the next step in office independence.

Please call me with prospective job opportunities. I am interested in a project management role in the Rs. 9K range.

Thank you!

Venkatesh.
